**AMENDMENTS TO THE SPECIFICATION**

**IN THE TITLE:**

Please amend the title as it appears on the first page of the specification and in the U.S. Patent and Trademark Office's records, as follows:

**METHOD FOR MULTI-FUNCTION SCANNER AND METHOD THEREOF**

**IN THE SPECIFICATION:**

Please amend the paragraph beginning on page 1, line 4, as follows:

The invention relates to a method for a multi-function scanner, ~~scanner and method therefore~~, and more particularly to a method applied to a multi-function scanner capable of scanning a normal document without a laser/anti-counterfeit mark and a special document with the laser/anti-counterfeit mark and capable of effectively removing the laser/anti-counterfeit mark from the scanned ~~image, image, and a method for the scanner~~.

Please amend the paragraph beginning on page 3, line 15, as follows:

Thus, it is an important subject of the invention to provide a method applied to a scanner capable of scanning a normal document without a laser/anti-counterfeit mark, and a special document having the laser/anti-counterfeit mark without being influenced by the mark.

Please amend the paragraphs beginning on page 3, line 20, as follows:

It is therefore an object of the invention to provide a method applied to a multi-function scanner, which may scan a first document without a laser/anti-counterfeit mark and a second document with a laser/anti-counterfeit mark and may effectively remove the laser/anti-counterfeit mark from a scanned result of the second ~~document, document, and a method therefor~~.

Docket No.: 3722-0156P

Another object of the invention is to provide a method applied to a multi-function scanner, which is capable of conveniently enabling the scanning process of the first document or the second document. ~~document as a method therefor.~~

Please cancel the paragraphs beginning on page 4, line 5 and ending on page 5, line 5.

Please amend the paragraphs beginning on page 5, line 6, as follows:

To achieve the above-identified objects, the ~~The~~-invention also provides a method for a multi-function scanner for scanning a document with a laser/anti-counterfeit mark. The method includes the steps of: pre-scanning the document to obtain a preview image; recording a zone of the laser/anti-counterfeit mark selected by a user on the preview image as a marked zone; using a visible light source to scan the document so as to obtain a first image corresponding to the document excluding the marked zone; using an infrared light source to scan the document so as to obtain a second image corresponding to the marked zone; and combining the first image with the second image.
